

PROJECT ELENIE

BY SOPHIA_LI [16 AUS]

WATCHED PROJECT HAIL MARRY and wanted my own Eridian bot ROCKY! Meet Eleni [torch in Greek]. This robot has 5 legs and at least 8 degrees of freedom, it has a OLED showing cute faces, temp and custom information. Has a remote control mode that is linked to a controller but also could just be a desk top buddy with automatic responses to temp change, tap on the head and time. Would make your life a bit more cozy and whimsy:)))
